Amdt date August 20, 2003

**REMARKS/ARGUMENTS**

The parent application (Application No. 09/118,218, now issued as U.S. Patent No. 6,366,988) refers to Appendices A, B and C on page 34, lines 18 to 23, but omits a copy of this source code in a form prescribed by 37 C.F.R. 1.96(c) as in existence at the time the parent application was filed on July 17, 1998. The microfiche submitted herewith (two identical microfiche; 44 frames) is identical to the appendices in the parent application and therefore do not represent new matter.

Drawing sheet 20 has been edited to more clearly present Figure 18. No changes or new matter have been added.

Respectfully submitted,
